***Reasons for Allowance***

The following is an examiner's statement of reasons for allowance:

1. Independent claim 1 and the claims dependent thereon have been allowed because none of the references of record teach or suggest a joint exothermic catalyst stage comprising at least one shift stage and a fine purification stage downstream of the shift stage, both configured as a unitary hollow body, wherein a methanization catalyst for the fine purification stage comprises ruthenium.
2. Independent claim 15 and the claims dependent thereon have been allowed because none of the references of record teach or suggest a process for producing a joint exothermic catalyst stage comprising application of a methanization catalyst comprising ruthenium on a second support to at least a part of the length of the hollow body which is not covered by the first coating.
3. Independent claim 18 and the claims dependent thereon have been allowed because none of the references of record teach or suggest an apparatus for producing hydrogen comprising a heated steam reforming stage, at least one shift stage and a fine purification stage downstream of the shift stage comprising a methanization catalyst comprising ruthenium, wherein the shift stage and the fine purification stage are configured as a unitary hollow body.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

Claims 1-4 and 7-21 have been allowed.

The terminal disclaimer filed on 05/29/2009 disclaiming the terminal portion of any patent granted on this application which would extend beyond the expiration date of U.S. Patent Application No. 10/508,881 has been reviewed and is accepted. The terminal disclaimer has been recorded.
